## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 20 July 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of Group 1, Species C in the reply filed on 7/20/04 is acknowledged. The traversal is on the ground(s) that the species lack distinctness. This is not found persuasive because there are clearly many physical characteristics that distinguish the species from one another. The requirement is still deemed proper and is therefore made FINAL. Claims 4,5,7,10-12,15,18-20, and 23-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 7/20/04.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3,6,8,9,13,16,17 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No. 6,258,117 to Camrud et al.

Camrud discloses a device for treating a body canal that has a proximal end-piece (128), distal end-piece (132), and body comprising a plurality of interconnected loops (126,130). Loop 130 is circular. All of the loops are closed. Regarding claim 16, the embodiment of Figures 6A-C has a distal end-piece (12), proximal end-piece (18), a

tubular segment (14 or 16), and a plurality of interconnected loops (94,96). Camrud explains that the members include biodegradable material (column 9, lines 45-60).

***Allowable Subject Matter***

3. Claims 21 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: While prior art discloses devices for treating body lumens that are formed of interconnected loops, prior art fails to disclose such a device with end pieces that are spherical and have a larger cross section than the body portion.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent No. 4,334,327 to Lyman et al. discloses a ureter prosthesis that is substantially similar in structure to the segment of Figure 3A.
